Creating Equity, Improving the Health of Our Community

Through this proposed partnership we have the opportunity to make a larger impact on the health of communities across North Carolina and beyond. Together, we will make “remarkable” real, by bridging patient safety and quality with community integration and creating equitable access to care for all.

Partnership Pillars

**People First**
Delivering Remarkable starts with caring for our team members

**Equitable Access for All**
We will keep an intentional focus on population health and achieving health equity

**Superior Quality & Safety**
We will achieve excellence and gain national recognition for the highest standards of safety and quality

**Physician-Directed**
Physicians are the cornerstone of our organization and set the tone for how we provide care

**Community-Based**
We will enhance the health of the region by expanding access to high-quality care, close to home

**Strength-to-Strength**
We will build on our shared mission, vision and values to achieve more together than either of us could independently
